EC

25X1X Industrial Council of the SMA Karlshorst
Section for Production Planning

25X1X

Industrial Order Number 16

To the directors of the SMAIV of the Russian zone of occupation:

The present difficulties in obtaining raw materials and the confused economic and political situation necessitate strictest control of factory rationing and the use of raw materials. Therefore order:

1. that every director of an SMAI personally check those factories under his supervision once each month to make sure that the planned production level is being maintained;
2. that a report on each of the factories visited be submitted before the 15th of each month;
3. that all shortcomings in production be corrected in the factory;
4. that the heavy industries, as producers of large quantities of defense goods, receive all needed assistance, in order that lags in production be avoided;
5. that all factories preparing metal goods and explosives be assigned the best available specialized workers in order to make up production deficits of the second quarter;
6. that reparations orders be filled only if the production of goods mentioned under 4 is not hindered thereby;
7. that all inspectors from the industrial council who are provided with a special pass, including German specialists, be given any information which they may request;
